

## The RayCube RC2 is a compact high-end fully immersive Telepresence studio designed for the most common meeting profile of between 2 and 3 people.

Telepresence technology is now extremely reliable. The focus is how to create a great user experience.

The RayCube is a holistic solution that integrates the technology into a fully immersive environment ensuring the user remains fully focused on the meeting.

Video collaboration is now considered mainstream for IT management and is being integrated into the corporate communications strategy. Video is changing the way we work; enabling a more efficient and productive working environment.

The RayCube family of products address the challenges management face by providing a cost effective fully immersive holistic Telepresence environment.

The RC2 is the baby of the family, but is considered to be our flagship product as it is designed to accommodate the most common meeting profiles.

Research shows that most locations in a video meeting have 2/3 people. The RC2 occupies a very small footprint, but comfortably hosts 2/3 participants in a stylish environment.

The interior design is focused purely on providing the finest immersive experience. Strategically positioned glass elements create the relaxed feeling of space and openness, whilst maintaining a secure environment.

The RayCube products have been designed by leading experts in video communications.

# RC2 Technical details

## Dimensions and Weight

W: 3.0m D: 1.9m H: 2.45m W: 1.000 kg

## Space requirements

Minimum ceiling height 2.8m

Minimum lift size for access (m): 2.2x2.2x2.4

## Connections

A single power outlet and a standard Ethernet network port are all that is needed to connect the RC2 to the videoconference network.

## Available Options

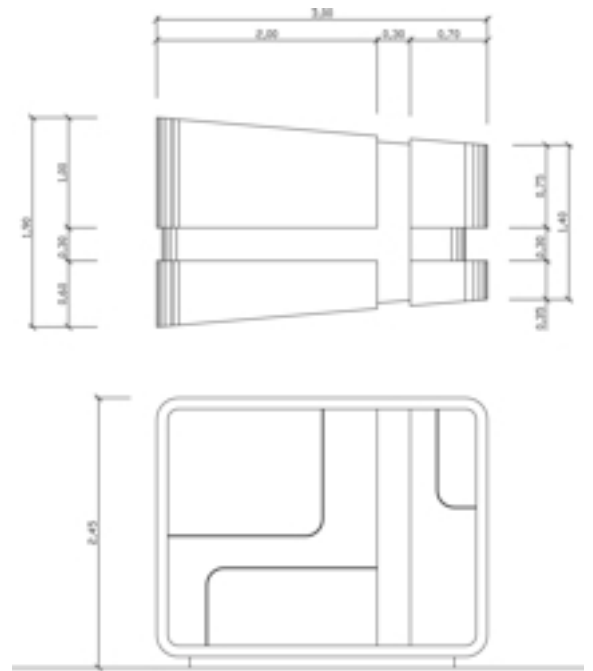

Electric door, Multimedia screen, Booking screen, Bench, External floor lighting, Integrated air-conditioned and External branding. Note: VC equipment and screen not included.

## Customised Approach

The RC2 is designed with standard interior colours; however each unit can be tailored to a client's individual choice of colour and corporate identity. This bespoke design would also include the carpet, seat and acoustic fabric, and would not incur any extra costs. The RC2 is finished in a high quality white coating, but exterior bespoke designs and corporate branding can also be applied at an additional cost.

## Project Management

The RC2 will be built using the customers' own preferred choice of videoconferencing equipment. We will work with your technology provider to ensure a seamless installation. All equipment; including audio speakers, microphones and screen (up to 46") will be integrated into The Cube. This will ensure quality and reliability, and remove any technology concerns from users.

## Build and Installation

The RC2 is built in Germany by highly skilled craftsmen. Each unit is hand built and assembled in the factory where each component is quality checked. Once the unit has passed the vigorous checks, it is dismantled and packed for shipping.

The RC2 is shipped directly to the installation site and met by a team of highly trained experts who will then assemble The Cube.

The installation is scheduled for one day. During the installation the Terenci team will work with the videoconferencing technical provider to ensure the
